Important Customer Notification

This morning, we received a formal notification from Cool Delights Desserts that a small number of their products were displaying low levels of Listeria Monocytogenes.

Listeriosis is not usually serious for most people, but some people have a higher risk of serious problems, including:

- *anyone who is pregnant.*
- *newborn babies*
- *people with a condition that weakens their immune system, such as cancer, diabetes, liver disease or kidney disease.*
- *people having treatment that weakens their immune system, such as chemotherapy or steroid tablets.*
- *Older people are also at higher risk of getting seriously ill from listeriosis, and this risk increases with age.*

As a precautionary measure we have placed on hold all Cool Delight products until further notice and we will endeavour to provide customers with an adequate substitute product until this matter is resolved.

Please accept our most sincere apologies for the inconvenience caused in relation to this issue.

Yours sincerely

[Ian Merrilees](#)
Group Technical Director
